CAMPBELL, THE INCREASED CITY OF THE FAMOUS SANTA CLARA VALLEY

Campbell INTER-URBAN Press

FOR THE BEST INTERESTS OF CAMPBELL AND COMMUNITY

VOL. 31, NO. 41 CAMPBELL, SANTA CLARA COUNTY, CALIFORNIA. FRIDAY APRIL 9, 1926

California Ranch News

Cotton growing in California has become an important and valuable industry.

Grape growers met at Exeter, Tulare county, recently, to discuss the handling of the 1926 crop.

The latest sales of the California Farm Bureau Marketing association brought a total of 21,170.89.

Many vineyardists in Lodi section are grafting their Tokay, Cornichon and other vines to juice grapes as fast as possible.

Fred Hansen, owner of the Sonoma Valley Hatchery, reports one of the largest baby chick seasons in the history of his plant.

The poultrymen of Tulare county are feeling optimistic, and good demand with fair prices has ruled for all poultry products.

Indications point to higher prices for Kadot.. figs this season at Terra Bella, Tulare county as compared with those of last year.

Irish potatoes are going into the ground in the Woodville district, Tulare county, in greater number this season than ever before.

There were 2,534 cows from eighty-three herds tested during February in the Imperial County Farm Bureau Cow Testing association.

Sheepmen in Modoc county are being offered 35 cents per pound for the 1926 wool crop with a large cash deposit immediately available.

Earl Mills, Butte county horticultural commissioner, says that increased activities in tree planting is now being felt in Butte county.

Vegetable planting in the San Jacinto valley this spring is marked by a considerable increase in the acreage set out to onions and Irish potatoes.

The Southern California Rabbit Breeders' Association at Pomona, has promised its co-operation and support in the organization of a boys' and girls' rabbit club.

Federal government figures of ginning operations of the 1925 cotton crop in the San Joaquin Valley show that 76,289 bales were ginned in five counties last year.

The 1925 cotton crop of Kern county, now practically harvested and ginned, amounted to 32.000 bales and its conservative estimated value was placed at 3,200,000.

"Catch 'em young and treat 'em rough" is the motto of Deputy Horticultural Commissioner Meredith Corwin, Bakersfield, when dealing with puncture vine.

The grass is turning green on the mountain slopes of Big Bear valley and the cattlemen are preparing to bring their herds back to the government range this summer.

Grazing in San Luis Obispo county is better this year than it has been for a number of years and the cattle in consequence are in fine condition. The generous rains have benefited all lines of agriculture.

The warm weather of the past month at Brawley, Imperial county, has brought up an abundance of green feed for the cattle and sheep which are being fed and fat stock is beginning to move to market.

Sixty-seven cows in Riverside county have been branded with a big "T" by Dr. J. W. Caldwell, since his appointment as county live-stock inspector in February. This was done under the provisions of the anti-tuberculosis cattle ordinance.

Clive Hinckley, one of the most successful poultry men of the Redland section, San Bernardino county, has just received over 3,000 baby chicks from which he expects to get about 1.000 pullets to replace laying stock which he must dispose of this year.

Citrus growers hereafter identified with the Garden Grove Citrus association will have to sell all or more of their fruit through the organization, under an amendment to the regulations of the association voted at the annual meeting of the growers held at Garden Grove recently.

The Santa Barbara county cow-testing report for February shows that there were 280 cows from eight herds on test, that produced an average of 573.4 pounds of milk and 22.2 pounds of butterfat each.

Golden State
News of Interest to All

Construction of a $50.000 sewerage system in Hayward will be started at once.

Southern California has become the largest colored tile consuming center in the world.

The 1926 Orange county fair will be held on property on the state highway at Santa Ana.

Mrs. Elvira A. Glendenning, pioneer resident of the Scott valley district, is dead at the age of 87.

Sawmills in the El Dorado forest district are now operating at full blast for the spring cut.

The sixth annual wild flower show was held at Ukiah, Mendocino county, March 29, 30 and 31.

Corning, Tehama county, will hold its third annual festival and band carnival April 30 and May 1.

Panthers are numerous in Mendocino county this year and causing much destruction on ranches.

The teachers in the rural schools near Healdsburg, Sonoma county, have formed a Rural Teachers' association.

The recent strike made in the old Harriman mine near Jacksonville, Tuolumne county, grows richer with every round of shots.

An architect has been selected to draw plans and specifications for the new $100,000 Elks' lodge building, to be erected at Ventura.

Considerable interest is being manifested at Isleton, Sacramento county, in the Asparagus Festival which will be held May 15 and 16.

The 1,000,000 commercial and residential hostelry projected as the Hotel Constance at Pasadena will be immediately constructed.

Red Bluff is to have another new industry in the near future when a factory for the making of fruit and berry baskets will be established.

Preparations are being made at Willows, for a big celebration some time next month in honor of the completion of the new $2,000,000 hotel.

Preparations are being made by the State Highway Commission for beginning the work of rebuilding the San Juan-Hollister section of the state highway.

Every civic organization in California wil' be urged, during American Forest Week, April 18 to 24, "to perpetuate American forests for the American people."

Surveyors have completed subdividing Sunshine ranch at San Fernando, Los Angeles county, and a crew of men are clearing the large acreage for home building.

Enrico M. Cunoo has applied to the railroad commission for a certificate to operate auto passenger, baggage and package service between Jackson and Cook's station, Amador county.

John R. Knight, student of the Glenn county high school at Willows, and president of the student body, has received notification of his appointment to the Annapolis Naval Academy.

Plans for a seven-story class A building, to cost approximately $200,000, for the Santa Monica Telephone company at Santa Monica, have been completed and construction work will start soon.

Architects, have prepared plans for rebuilding the St. Francis hospital at Santa Barbara. The new structure will be four stories in height, and will have accommodations for seventy beds.

B. D. Mason, dairy inspector of the state department of agriculture, has been appointed official representative of the department on the board of directors of the San Francisco Mercantile Exchange.

Carmichael. Sacramento county, voters polled a vote of 110 majority or a total of 146 in favor of the issuance of $19,500 of elementary school bonds for the construction of additional school buildings.

A lighting district, taking in the town of Guerneville and extending all along the roads in the Russian river section, now being formed, will prove another added attraction to the playground on the river.

Oakdale, Stanislaus county, is to have another beauty spot, the Southern Pacific having given City Clerk Clarence Wood permission to convert the right of way in front of the city hall into a city park.

The Lions' Club, Merchants' association and other civic bodies at Manteca, San Joaquin county, are joining hands in a move to send the Manteca band to Fresno to take part in the Raisin day festival on April 15.

The Salinas county board of supervisors has selected a sixty-acre tract in the Santa Lucia range, near the head of the Arroyo Secco, as a memorial park in honor of the soldier and sailor dead from that county.

CONSOLIDATED BUSY ON WATER PROJECT

At an overflow meeting of the members of Santa Clara County Consolidated held at the Vendome Hotel, San Jose, Tuesday, April 6th, at 12:15, Water Conservation in the Valley was the chief topic of discussion.

Chairman Roberts of the Water Conservation Committee read his report of the survey the committee had conducted and offered various tentative plans that he stated would bear further investigation. "Check dams and absorption wells are necessary in some cases. In the case of wells where the bottom is of solid rock and the surface water cannot seep through the blasting of holes through these solid stratas is desirable," said Roberts.

"In the case of surface water where irrigation is practical dams in the hills where the gravel beds are located is a very practical plan.

"Owing to the growth the urban populations our underground water supply has dimished greatly. In the future it seems advisable that the urban water, especially for the City of San Jose, be obtained from some outside sources.

"Financing of such water propositions is of great importance and your committee has considered this angle thoroughly. One plan is to create a valley irrigation district and to levy a tax that will cover the entire district. The other plan is to arrange the county into a number of irrigation districts and to tax each section according to the work done therein. This first plan seems to be the most feasible since the project is so large. The natural objection to this, of course, is the fact that some of the sections would be unfairly taxed."

After the report was finished the members showed their great interest by a lengthy discusion. E. A. Hayes, who has made a number of surveys of the water problem in the valley, offered a number of suggestions.

"The suggestions made so far are very good but it seems to me that we can go even further," said Hayes. "After the thorough investigations that I have made I feel we can conserve our water very practically and economically. The water that runs off to the sea is our chief concern and since this comes down from the mountains primarily earthen dams to form reservoirs should be placed at the gravel beds in the streams in the hills and mountains in order that the surplus water may be retained. This should be allowed to run down when the water is needed or when the ground can best obsorb it.

"As Mr. Roberts has said, the other angle to water conservation is the urban population's supply of water. My idea is that this should be procured from some outside sources. Earthen dams can be built very inexpensively comparatively and it seems to me that this is the best solution."

Joseph T. Bone of San Jose, Chairman of the County Grange Water Conservation Committee, suggested that not only the farmers of the Valley but also the authorities of San Jose and other communities as well as all factions and all elements be brought together before a definite plan of any kind was launched. This was later announced by Roberts as the plan that had been adopted when the Consolidated Committee had first met.

Chairman Powers of Prune Week urged the members to offer any suggestions that would make a better prune week this coming fall. He stated that great interest had been caused in the east by the Valley prunes sent last year. He said that this community could derive great benefit from this free advertising that was most practical in its application.

The next meeting of Consolidated will be held at Mountain View, April 4.

Those in attendance representing Campbell were: Horace Lea, I. R. Abbott, G. E. Farley, S. N. Hedegard, C. H. Whitman and H C. Smith.

H. LEA, Commissioner.

A very light vote was cast Monday for Fire Commissioner, resulting in the election of Horace Lea. His opponent was C. W. Shumway, but little if any campaigning was done, and the fact that there was an election evidently was forgotten by many.

J. C. AINSLEY PLANS FOR BIGGER PACK

The proper housing and comforts of their fruit workers has always been one of the chief concerns of the J. C. Ainsley Packing Co.. and plans are now being made to erect from 30 to 40 new cottages in the near future for this summer's occupancy. These cottages will be of the two room variety to accommodate two to four women workers with comfortable quarters near their work. They will be built between the present cottages and the creek. In this tract will also be built an additional storage house 80x160 feet as an auxiliary to the plant.

In the cannery the cooling room has been enlarged to a floor space of 36x200 feet. When ready for this year's pack the plant will be equipped with a battery of 10 high speed double seamers increasing the possible output to double that of last year. The preparation room has been extended affording a considerable increase in the quantity of fresh fruit handled. Mr. Ainsley is considering other improvements that may be made before the season is far advanced. His hobby is efficiency and each season has seen his plant grow in size and capacity with remarkable strides and its success has been a source of great pride to all in the community

GRAMMAR NOTES

Miss Farman, the Grammar school domestic science teacher, served a luncheon to the business men of Campbell, Wednesday noon, April 7, 1926.

BAND CONCERT

Mr. Towner is to give a band concert next Wednesday night at the Grammar School auditorium. Band classes from Moreland, Santa Clara, San Martin and Campbell will give an evening's concert free to the public. This is the last of these concerts to be given, the others having been put on at Moreland, Santa Clara, etc., before this.

The Committee on Public Education seek from Charity Lodge No. 362 has secured Judge Percy O'Connor as the principal speaker of the evening

Other numbers on the program will include a saxaphone solo, vocal solos, pieces by the Grammar School Orchestra and moving picture contrasting schools in the Balkan States with our own in the U. S.

P. T. A. PRIZE

At the monthly P. T. A. meeting of the Campbell Grammar School, Miss Mace's room won the prize for attendance. This is the last time Miss Mace's room can win the prize because they have won it for the last three times.

OPERETTAS

The students and teachers of the Campbell Grammar School are working hard on the Operetta to be given in the grammar school auditorium Thursday, April 29.

Good Will Club Plans Card Party

Moreland Good Will Club met with Miss L. Cassidy, March 31. After the usual opening some time was taken by committee for a card party to be held at the home of Mrs. Gary Holtum, Aphil 17; also of the Farmer's Union meeting which was held the next evening at the hall.

Owing to illness the one in charge of the program was unable to be present and the afternoon was well spent in devising plans for future activities of the club.

Dainty refreshments were served and the meeting adjourned to meet at the hall, April 14th.

An open meeting to which the public is invited. A Travelogue by Mrs. J. E. Bell, being the principle feature of the afternoon.

CAL. CANNERIES CO. TO DOUBLE CAPACITY

The California Canneries Co., is making extensive improvements and additions to its Campbell plant in readiness for a bigger canning season than ever.

The Company has purchased of W. F. Grattan a four acre piece of ground back of the present cannery building and concrete foundations have been poured for a new warehouse and cooling room 64x260 feet. All departments are being expanded whereby the floor space will be more than doubled and the packing capacity almost doubled.

More than seven cars of lumber will be used in the expansion of the plant.

The office is conviently located at the west side of the plant and the receiving department enclosed from track to the office. The trackage for loading and unloadin gwill be continued full length of the east side of the plant 480 feet wtih space for extra cars.

Three more large cookers are to be added to the cook room, which is being moved some distance toward the warehouse.

The new manager, Mr. R. Woelffel, is an experienced canner coming here from the K. Hovden, Portola Sardine cannery at Monterey. The placing of the new machinery and apparatus is under the supervision of J. Clementz, who has been with the company for some years.

With the plan of greatly increasing the pack considerable more help will be needed and Campbell is looking forward to a big influx of fruit workers as soon as the canning season opens.

P. T. A. OF HIGH SCHOOL BUSINESS MEETING

The regular meeting of the high school P. T. A. will be held in Miss Gardiner's room at the High School main building on Tuesday afternoon April the 13th at 2:30 o'clock. All officers and chairmen of departments must be present to discuss very important business coming up at this time.

It matters not how well throughout the plans may be—a meeting will not be a success without the presence and participation of parents and members. In fulfilling our obligations and promises are we not practicing what we preach to our children daily, "Be Reliable." Some one has said, "If we would train just one generation to its sense of responsibility—most of our social and civic problems would disappear in twenty-five years."

Let us as P. T. A. members show our children, that, as workers to promote thei rwelfare at school as well as in the home and the church, we can keep our pledge; we can be reliable.

Try to be present at next Tuesday's meeting.

Rebekahs Celebrate

Following the regular session of Ada Rebekah Lodge Tuesday evening the committee in charge of the social hour had arranged for cards. Although the stormy weather prevented a large attendance, a very pleasant time was enjoyed.

Honors for the ladies were won by Mrs. A. B. Covey, who was presented with a pretty flower bowl, and E. J. Snow won the deck of cards that was the gentleman's prize.

Campbell boasts of a stellar volley ball crew and is receiving all comers. Tuesday evening they met and defeated Saxon's Kiwanian giants in three most decisive games at the Campbell gym, by 15 to 7; 15 to 7; and 15 to 5 scores. Next Tuesday evening the San Jose Lions will be pitted against our boys. The Campbell team this week played Bart Guttormsen, Guy Farley, Ed Kennedy, Elwood Baugh, Wayne Davis and Pat Kennedy.

BULGARIA STUDIED AT CLUB SESSION

Those who were not deterred by the rainy day from attending the meeting of the Country Woman's Club Monday enjoyed a very interesting program on Bulgaria. This is the last of the group of countries of south central Europe which have seen studied during the club year, and much of interest and enlightment concerning conditions in these places has been presented. Mrs. D. H. Cramer, as chairman, gave the needed background of geography, productions and history to create a better understanding of present economic conditions. An interesting article, "Understanding Bulgaria" was read by Mrs. Righter, and Mrs. W. I. Merrill gave some interesting items about the painters and sculptors with descriptions of a few of their noted works. The main topic, however, was under the caption, "America's Influence in Bulgaria." It showed what this country has done in the past nad what the people still look to us for.

Mrs. R. H. Hyde, vice president, was in the chair, in the absence of Mrs. Alison, whose recent injury prevented her attendance.

She announced the committees for the Spring Garden Party to be held at the home of Mrs. J. C. Ainsley.

Mrs. Alison expects to be able to attend the District Federation of Women's Clubs which convenes in Santa Cruz, April 15, 16, and 17. Mrs. E. R. Kennedy was elected as a delegate, with Mrs. D. H. Cramer as alternate. All of the members are urged to attend some or all of the sessions.

The next regular club meeting will be April 19, when the Los Gatos History Club will give a return exchange program, of which Mrs. Sanborn Young, Ruth Comfort Mitchell will be in charge. This will be an open meeting and guests will be welcome.

PRE-SCHOOL EXAM. PLANNED FOR MAY

The P. T. A. of the Grammar School held a very interesting meeting in the auditorium at 2:30 Tuesday April 6th.

Miss Weiss, the school nurse had prepared the program. Mrs. Wilson's grade, the High 1st, gave a health play, instructive but also laughable and the children did their parts very well.

Mrs. Brancato, dental hygienist of the Santa Clara County schools talked on the care of teeth. especially children's.

Miss Ruth Matteson sang two solos, which were pleasing.

Mrs. Cobb, the financial secretary of the Tuberculosis Association talked on the value of the pre-school examination. There were many mothers present to profit by her information and we should like to call to the mind of others that Campbell will hold a pre-school examination in May.

The delegates to the annual meeting of the Federation were appointed as follows: Mrs. Barnes, Mrs. Hedegard, Mrs. Bollinger, Mrs. Lopes, Mrs. Hutton, Mrs. Wood, Mrs. Lear and Mrs. McCoy. This will be an all day meeting beginning at 10.30 at Sunnyvale, on April 19th. Lunch will be served and those wanting reservations for lunch will please notify Mrs. Schuyler by April 15th.

The annual meeting of the Sixth District will be held at Santa Cruz, April 30th and May 1st. Those who plan to attend and wish accommodations for the night will also notify Mrs. Schuyler.

This week has seen a heavy down-pour and it is still coming. In places as much as 4½ inches has been reported for the first storm.

Add sales value to your house

IT will sell quicker, and bring you a better price, if you dress it up a bit; or, if you're not selling, it will be worth more to *you!* For instance, a gleaming coat of white on the siding, with red roof and leaf-green shutters—you'll be surprised at the difference. You can *ask* more, and get more!

Any time you wish, we'll be more than glad to help you select just what paints and varnishes you need for any decorating problem. We want you to be satisfied; that is why we back our judgment with du Pont Paint—it's *master-made!*

MARASCHINO GRAPE IS PRODUCED BY SELMA MAN

Selma, (Fresno Co.)—O. J. Steinwand of this district, who has developed a number of processes for grapes and raisins, has came out with a new one which is attracting considerable attention as a possible outlet for a huge tonnage of Thompson seedless grapes. It is the maraschino grape, and according to John A. Thompson, chef in a large Fresno hotel, it is a "knock-out." The grapes are peeled by Steinwand's process, and are treated to the maraschino syrup just as are cherries, coming out plump and red and good to eat. Thompson has them on his bill of fare to be served as a garnishing for grapefruit, and says they are very attractive. This is the first time they have ever been served to the public. The grapes can be processed and marketed at a lower price than cherries, and should find a ready market it is believed here.

Some person has said that, barring women, hens are the most uncertain creatures on earth. The White Leghorn flock of 300 on the Combes ranch near Owensmouth, Los Angeles county is no exception to this rule. In one day recently, the largest and smallest eggs ever produced on the ranch were laid by two hens, about the same size and weight, living under the same conditions and receiving the same rations. The largest egg, the owner says, was more round than oval shape, measuring 7¾ inches around the long way, and 6⅛ inches around the short way. It weighed 3¼ ounces. The small egg was a scant 3 inches by 2¼ inches and weighed only a shade over one-fourth ounce.

Palm leaf barns are becoming the style in the Lindcove district of Tulare county and bid fair to become common all over the interior valleys.

The storage of eggs for the new season at Petaluma, has begun and it is expected to exceed the record of any previous year. In 1925 there were 95,000 cases stored, the entire capacity of the Petaluma cold storage plant at that time.

Ranking among the highest butter fat producing 2-year-old cows of the state, a heifer owned by the California Junior Republic, Chino, has made a record of 16.39 pounds of fat from 540 pounds of milk in an official seven-day test.

Out of 148,298 chicks brooded on 77 different poultry ranches in Sonoma county during 1925, the average mortality during the first two weeks amounted to 7.3 per cent as compared with 8.9 per cent for the similar period in 1924.

During February, nine cars of spinach, thirty-two of chicory, seventy-four of greens, four of mixed vegetables, one of squash, eight of endives, six of peas, eighteen of grapefruit and 3226 of lettuce left Imperial valley.

Of paramount interest to those attending the annual meeting of horticultural commissioners and farm advisers of southern California, held at the citrus experiment station of the University of California at Riverside March 16, was the account of recent experiments with a new fumigation method for citrus trees by Prof. H. J. Quayle of the station faculty. If the new method stands up under the severe tests being given it, fumigating will be simplified and made less dangerous.

A LONG FIGHT AHEAD

Senator Edge's joint resolution calling for a national referendum on Prohibition in the congressional election of 1928 presupposes a long, drawn out battle. Even if such a resolution should materialize into action and the States should vote on the dry and wet question and decide for modification of the present laws, it would be only a starter. It would take as long again to secure any effective legislation that would legislate the manufacture and sale of alcoholic liquors for beverage purposes. Booze has been outlawed nationaly for six years. By the time it gets its plea heard before the court of public opinion and made into law there will have been an entirely new generation sprung up whose verdict we know not.

OFFICERS ARE VIGILANT

No stone is being left unturned by Los Angeles County officials to solve the mystery of the death of William Desmond Taylor. District Attorney Asa Keyes takes up the search to which the former district attorney, Thomas Lee Woolwine, had devoted his efforts. Four years is none too long to continue the work of finding a murderous culprit, if such there was, whether his victim be of high or low estate. The crime has attracted more than its share of attention because film stars were alleged to have been associated with the events surrounding the case. Unfortunately, however, the pubilcity given to Mabel Normand and Mary Miles Winter has given rise to inferences thus for unfounded on fact. Almost to the point of "persecution", Miss Normand puts it. It is the vigilance with which the prosecuting officals are pursuing the matter that elicits favorable comment among all who advocate that justice shall be done.

THE UNHAPPY MEDIUM

Victims of an alleged spirit medium paid $2 each to see departed spirits, but the only thing that departed was their money. As a result the police swooped into the seance. Later the happy medium was made unhappy when given 60 days in jail and fined $500.

It is the old story. Adults rush in and pay money to see ghosts where children fear to tread. But to satisfy the average mentality, the ghost of departed days ought to be quite sufficient. It is an apparition that appears at will and costs nothing.

HOOVERIZING MOTOR TRAFFIC

If Herbert Hoover succeeds in establishing uniformity in state vehicle laws and local ordinances affecting motor traffic he will have done the country a vast amount of good. Let's make the nation safe for tourists and all the rest. People shy at traveling in strange jurisdictions where traffic regulations are probably directly opposite from those they have been accustomed to at home.

They say it was shortly after a crowd of newspaper editors visited Florida that the boom started in that state. The National Editorial Association holds its annual convention in California this summer, so watch the Golden State! Fact is, there ought to be a premium on editors' conventions.

If all the fellows who oppose progress and criticize public spirited citizens were laid end to end the country would be better off.

Radio is a gift from an High. Imagine parents quarreling when turned in on the Wedding March!

Are Your Valuables Secure?

If you had a few hundred dollars and wanted to keep it for your own use, would you tuck it in a bureau drawer or behind the clock where it would be safe from neither fire nor theft, or would you put it in a bank?

Then why not put your valuable papers, jewelry and keepsakes in a safe deposit box of Mercantile Trust Company of California? The annual cost of a safe deposit box is so small that no family or individual should be without one.

We invite your inspection of our superior facilities.

The city of Weed, Siskiyou county, has selected a unique method of separating the chaff from the wheat in deciding which of its newcomers are desirable as permanent residents. The authorities simply round up the questionable characters and look at their pocketbooks. Ruling that an unemployed person without at least one dollar is an "undesirable citizen," the town fathers ousted 46 persons a short time ago.

If the ratio of increase in insanity in California maintains the average set since 1910 everyone in the state will be insane in 50,000 years, mathematicians of the State Department of Institutions have figured out. In the last sixteen years the number of insane in California has increased from 7,136 to 13,378. In 1910, one in every 333 was insane. In 1925 it was one in 299.

The tallest power line tower in the world—a shaft which will rise in the air 459 feet—is being erected by the Pacific Gas and Electric company near Rio Vista, Solano county, it was announced by company officials in Sacramento. A 220,000-volt transmission line will be raised on this tower and stretched 7,029 feet across the Sacramento river.

In addition to plans for a campaign to wipe out illegal secret fraternities in the high schools of California, the high school, junior high school and junior college principals, meeting in annual convention at Pasadena will consider a more comprehensive program for grouping pupils, according to intelligence and charter in classroom work.

Members of the Democrat State Central committee from all sections of California, in session at the Palace Hotel, in San Francisco, a short time ago, decided to hold a preprimary convention this year at Santa Cruz on Friday, May 21, for the purpose of insuring solidarity and efficiency in the campaign for the fall elections.

Preparation of a monument to be unveiled in Memorial Grove at Capitol Park, Sacramento, on Memorial day, has been ordered by the state board of control in keeping with an appropriation bill passed by the 1925 Legislature.

During the seven-year period from 1919 to and including 1925, the total volume of building in southern California amounted to approximately 1,400,000,000.

With Los Angeles as its leading construction center, California is third among the states of the union in volume of construction for February.

The State Board of Forestry plans to ask administration budget makers for an increase in funds for fire prevention and other forestry purposes during the 1927-1929 biennium, it was announced by board officials, who said the exact amount of the increase to be requested has not yet been decided. Governor Richardson's budget for the present biennium shows an item of 186,190 for the board, while his retrenchment budget of 1923 gave the forestry department $167,770.33.

An original copy of a treaty between white settlers and Indians, the first to come into the possession of the state library, will soon be presented to the state by H. E. Diggles of Sacramento. Other than its value as a memento of the stirring days when tribal Indians were often a menace to peaceful occupancy of the country by the pioneers, it has historic significance in that its signing saved a Shasta county community from probable massacre.

The Must Hatch Incubator company at Petaluma will begin the duplication of its great plant as soon as the city council amends the zoning ordinance to make it possible. The new building will give Petaluma the largest hatchery in the world. When the present building was opened with a capacity of a million eggs hatch at a time, all records of the world were broken, but the company now feels justified in doubling its enormous output.

An easy way to increase farm profits

Ninety-three per cent of all makes of automobiles now come equipped with Alemite or Alemite-Zerk high pressure lubrication.

Formerly the average life of an automobile was only three years. Today the average is six years. Alemite lubrication has done much to make this possible.

Alemite is just as good for farm implements. It adds years to their service. Cuts your costs per crop. Increases your profits.

You can replace every grease cup on the farm with an Alemite fitting. Let us show you how it will save you time, labor and money.

CONG L CHURCH NOTES

Sunday morning at 11:00, Rev. C. G. Marshall of Sunnyvale will preach in the absence of the pastor.

In the Bible School at 9:45 the Monthly Missionary program will be given.

In the evening at 7:30 the series on "Our Church Fathers" will be resumed The paper will be on Luther and George Fox, and will be given by Mr. and Mrs. George Schuyler.

Mr. Pugh asks that the regular choir rehearsal may be Saturday evening at 7:00 instead of Friday evening.

Mr. and Mrs. Eckles are taking a few days rest at Mt. Hermon.

Federation Party

The Foothill Federation of Parent Teacher Association will celebrate its first anniversary with a party to be held at the Copo de Oro Club house near Cupertino on April 17th. There will be tables for those who care to play cards and a good orchestra will furnish music for dancing. A general admission of 50 cents will include refreshments.

Town Tales Tersely Told

Mrs. Jennie Turnbull of San Francisco is a guest of Mrs. Lena Rodeck.

Mrs. C. E. DeSelle and sons spent last week at their cottage at Seabright.

Miss Margaret Blaine of the faculty of the Paso Robles schools has been enoying the spring vacation this week here with her parents.

Rural Carrier requests co-operation in maintaining approaches to Mail Boxes—P. L. and R. require the approach to be high, dry, clean and easily accessible at all times.

Walter Harriman of Payne and Phelps Avenues, has entered the Campbell Branch of the Mercantile Trust Company's Bank, where he plans to learn the banking business.

R. A. Shearer, who has been at the Lane Hospital in San Francisco for several weeks, receiving treatment for sciatic rheumatism is now at Byron Hot Springs, Contra Costa Co.

Miss Georgene Griffin of Palo Alto, who was killed Saturday night in the overturning of an automobile was an intimate friend of Mr. and Mrs. L. T. Lenox and had visited them a number of times.

We are happy to report that Mrs. R. Alison, whos ankle was badly sprained and the ligaments torn, has now been able to have the injured member strapped, and hopes to be out before long with the aid of crutches.

Miss Alice McCaughey, who is employed in the schools of Corona is spending the week here with her mother, Mrs. Wm. G. McCaughey. The latter is convalescing from a rather serious operation and is able to be out a little again.

Miss Abbie Sykes arrived Tuesday for a few days visit with Mrs. H. P. Bean before leaving next Tuesday on her way to Chicago, where she will spend the summer She is going via New Orleans and will spend some time in visiting and sight seeing.

Paving Program Scheduled

It is reported that work will soon be begun on the paving of Harrison Avenue. The survey has been made for the paving of Central Avenue but a definite time for the actual work of paving has not been set. Dad Sturtevant was busy this week touching up the dirt roads of this section this week and removing some of the objectionable rought spots. Pollard, Rincon and McCoy avenues are very rough and some judicious grading after the present storm would make a marked improvement in that section. It is hoped that some of them may ere long be put on the "paved" list.

Several days ago E. Lee Trinkle, President, and J. A. Rountree, Director General, of the United States Good Roads association sent a cordial invitation to Governor Friend Wm. Richardson of California inviting him to attend the fourteenth annual conventiona of the United States Good Roads association and tenth annual convention of the Bankhead National Highway association which will be held in conjunction with the United States Good Roads Show in Santa Monica, June 7 to 12. He was invited to deliver the address of welcome to the [illegible] distinguished guests and delegates [illegible] these conventions on the [illegible] night of June 7th. He was [illegible] invited to head a delegation of leading men and women to meet the train which will come over the Union [illegible] having on board many [illegible] and enthusiastic delegates to these conventions. This special is expected to arrive at the California state line on the morning of June 7, where Governor Richardson will formally welcome and receive the governors in his state. Governor Richardson has accepted the invitation.

Felix De Guyter, Van Nuys, put out an acre to French endive or whitloof last year as an experiment, and it did well. He says he secured a yield of about 4,000 pounds to the acre and that the market price ran around 25 cents a pound. This season he will plant two acres, and has sent to France for the seed.

PRIZES ANNOUNCED FOR LA FIESTA DE LA ROSAS PARADE

A list of prizes to be awarded participants in the parade of la Fiesta de las Rosas at San Jose on May 22 has been issued. The awards consist of blue, red and yellow banners, and silver trophies, in the following classes:

Class A—Floats, civic bodies other than San Jose.
Class B—Service clubs.
Class C—Hotels.
Class D—Automobiles.
Class E—Fraternal organizations.
Class F—Floats, representing business firms and manufacturers.
Class G—Organizations representing business groups.
Class H—Floats representing educational and religious units.
Class I—Boy Scouts of America.
Class J—Historical or representative characters.
Class K—One or two-horse, or pony-drawn vehicles.
Class L—Saddle horse, lady rider.
Class M—Saddle horse, gentleman rider.
Class N—Saddle pony, girl or boy rider.
Class O—Novelties.

A special sweepstakes trophy will be awarded the most beautiful entry in the parade, regardless of size or class, all entries being eligible. This trophy may be awarded an entry which may have won a prize in its class.

A special award has also been provided for the best saddle horse entered, horse alone to be considered.

The rules for judging are as follows:

1. The judges will consider the artistic arrangement and harmonious blending of the natural flowers, ferns, grasses, smilax, etc., together with the general artistic effect of the entry.

2. Natural grasses, ferns, smilax, brakes, trailing vines, palms, oaks, peppers, etc., may be used for decorative purposes; but in competition for prizes, flowers of beauty and quality shall receive the greatest consideration. Selection of green material should be carefully made, as the judges will give higher credits to entrants choosing the scarcer and more beautiful varieties, such as will lend themselves more effectively to float decoration.

3. Any entry using artifical flowers will under no circumstances be allowed in the parade.

4. Where there is but one entry in a class, the judges will not award the first prize but will note the fact, and in their discretion award a blue banner and one of the other prizes offered in that class.

5. Judges will take into consideration the appropriateness of the dress of the participants and drivers; and the truthfullness of the representations as well as the artistic merits of the decoration will be considered, in cases where historic or symbolic characters are used.

5bigagcae yzpi otianektopeepme

6. No entry must enter the line of march until it has first passed the inspection and approval of the Censor, of the parade.

The Executive Committee may also award special prizes for conspicuous merit, if in its opinion the occasion for such action arises.

ADVERTISING FIESTA TO THOUSANDS OF PEOPLE

The publicity Committee of Fiesta de Las Rosas has made arrangemenets for the placing of two hundred large billboards at strategic points along California highways telling the wide, wide world that the Fiesta de las Rosas will be held at San Jose, May 20 and 22.

A number of boards have already been painted and are located on the highways in Santa Clara County. At one end is a 8 foot replica of the official poster that has been adopted for Fiesta advertising. This is an attractive Spanish girl, dressed in brilliant colors, emerging from the heart of a large rose.

These billboards will soon be seen on all the main highways from the Imperial Valley to Eureka. The average estimated number of passerbys per hour is one hundred so that in a ten hour day, 200,000 people will read this announcement of the Fiesta de las Rosas.

FOR RENT—No. 30 Rincon Ave., Campbell. Inquire of Mrs. L. Miracle, 47 Rincon. 40-1t

SMITH'S STATIONERY STORE

That growers and shippers of Brawley believe that it is to be the center of a considerably greater production area is indicated by the fact that about a score of them are financing the building of a new hotel. It is to be a modern four-story building with over 100 guest rooms.

A large number of minnows are to be imported from California and placed in the streams, lakes and ponds of Nevada to combat mosquitoes, according to action taken by the Nevada Fish and Game Commission on the recommendation of the State Board of Health.

The simplest way to get the Chileans and Peruvians together would be to subdivide Tacna-Arica and advertise it as only a short hop from Key West.

LOST—Brown silk unbrella, Old Settlers Day, or since. Reward for return to Press Office.

You'll Understand Some Day

by O. LAWRENCE HAWTHORNE

Oh, little men, whom God has given me
To cherish and to nurture through the years
Of childhood, how it hurts my heart to see
Your faces clouded with unbidden tears,
Or in your trustful eyes the flash of fears
That suddenly disturb your spirits gay,
And drive the smiles of happiness away!

At times it grieves me most because I know
Your tears are prompted by an act of mine,
Some effort on my part to help you grow
In harmony with Nature's great design.
I wish that every moment joy could shine
Upon your busy little world of play,
And life could be an endless holiday.

I wish that everything you want to do
Could be accomplished in the way you planned;
But oh, so many tears must come to you
Before your baby minds will understand
The laws that rule our actions, and demand
A penalty for every word or deed
That violates what Wisdom has decreed.

And so, dear little men, I hope some day—
Perhaps I shall have crossed the Great Divide—
I hope that then your manly spirits may
More readily believe your father tried
To be your friendly comrade and your guide.
Oh, maybe you will thank me for these tears
When you recall them in the after years!

© 1925 O. Lawrence Hawthorne.

Lodi, San Joaquin county, grape growers feel no uneasiness over the voluntary application for a receiver for the Stewart Fruit company. The growers have less than $10,000 still due on the 1925 crop of grapes. Several of the creditors state this amount is amply protected. The Stewart Fruit company has been in business for twenty-one years, the greater part of which time, they have maintained a packing board there.

The olive packing season in the Mt. Ida Packing corporation plant, in Oroville, Placer county, ended recently after a five-months continuous season. The operations this year were the longest on record since establishment of the olive industry in Oroville. Indications are that this record will be broken again next year, when it is contemplated a full six-months operation of the plant will be required.

It is believed by many of the foremost citrus growers of Ventura county that considerable profit has been lost by the too enthusiastic use of the pruning knife. How much the loss has amounted to it is impossible to say, but probably if the growers knew it would shock them.

An early spring, following on the heels of a mild winter has resulted in an unusual stimulating of early plant growth, so that the season is about four or five weeks ahead of an average year.

One of the greatest mining discoveries in Tuolumne county in many years is the uncovering of a monster ledge, ranging from 80 to 300 feet, on the old Mullins' property near Tuttletown, once a lively gold camp, but now almost forgotten. Assays range from $2 to $12.

James S. Utley of Los Angeles, who recently purchased a tract of one hundred and forty acres of citrus land in the Oroville-Wyandotte Irrigation district, has arrived in Oroville, Butte county, for the purpose of starting work preparatory to planting a large orange grove. Utley plans to plant the entire tract to oranges. This will be the largest single planting of oranges made in that district in years.

Not long ago a two-headed heifer calf was dropped by a grade cow on the place of W. P. Blodgett near San Jacinto, Riverside county. While it is not robust, it is being given extraordinary care. There is a market for such freaks and already the Blodgett's have received cash offers for the animal. The calf appears to be perfect in body and is equipped with two heads growing from a common neck.

Almost half of the navel crop of California has been shipped and this holds true of that of the Redlands district, San Bernardino county. The shipments here have reached almost 1,900 cars and this is fully half the navels to be shipped, according to the estimates. The total shipments, navels, Valencias, sweets and seedlings from this district, for the year will be over 4,500 cars, it is believed.

"Westward Ho!" and the '49'ers in their covered wagons moved on—in a quest of better things—onward to the sun setting in the Pacific.

They—gifted with faith and confidence—paved the way for a development now enjoyed to a greater extent in California than elsewhere.

Thru business initiative the development of Hydro-Electric energy in this state has been financed and perfected most extensively—and service is available at a decreasing cost, within the reach of all.

French Inventor Plans for Airship on Rails

Paris bids fair to be the first of the world's largest cities to solve its rapid transit problems high in the air. Recent reports from the French capital indicate that actual construction work soon may begin on a remarkable high-speed air railway along which propeller driven cars suspended from an overhead monorail will travel 60 miles an hour, carrying thousands of commuters between Paris and the suburb of St. Denis.

Designs for the airway have been completed, examined by expert engineers and found to be practicable, writes Arthur A. Stuart in Popular Science Monthly. The proposed car for the Parisian line would be virtually a propeller-driven airship suspended from and running along a rail. Its body, tapering off at both ends like a dirigible, would be built of duralumin, extremely light, while it would be capable of carrying from sixty to one hundred passengers. The entire car, including equipment, would weigh only five tons. Present plans call for a car 40 feet long, 7 feet wide, 7 feet high, driven by a 9-foot propeller. The car would be driven by either a gasoline or electric motor. A reversible propeller would permit it to be run in either direction. Extra cars could be hooked on to a propeller-driven car in rush hours.

American Medical Men Praise Chinese Drug

An ancient Chinese remedy, esteemed in the East for 5,000 years, promises to become a powerful new tool in the hands of modern doctors. When introduced into laboratories of the University of Wisconsin by Dr. K. K. Chen, the drug stood stiff tests as a treatment for asthma and colds in the head, and also as a local anesthetic.

The drug which is being studied by Doctor Chen is known as ephedrine and is the active principle of a lowly herb.

"The plant has long been used by the Chinese as a treatment for asthma," said Doctor Chen in an interview. "It is characterized by the sweating which follows its use."

Used in asthma, ephedrine forces the muscles to relax around the air passages in the lungs. The effective area of the lungs is thereby increased and breathing becomes easier. Its use in a head cold is to close the ducts of the secreting glands, thus relieving the condition known as a running nose.

Because tests indicate that it is more powerful and more perfect, ephedrine is expected to supplant adrenalin, which is obtained from the adrenal glands of animals and put to a variety of clinical purposes. —Science Service Bulletin.

Auto Industry Largest

United States census reports show that in 1919 there was $32,666,633 invested in the perfumery and cosmetics industry in the United States, and that the total value of its products in that year was $59,-513,391. The automobile industry was reported to have represented, in 1919, an invested capital of $1,780,948,952, and to have turned out that year a product worth $3,-080,073,979. The national automobile chamber of commerce gives the wholesale value of automobiles and automobile parts produced in 1924 as $3,168,588,146.

For Scientific Eating

A course in scientific eating has been established at the Kansas State Teachers' college at Hays, Kans. "A person is not educated unless he knows how to select a properly balanced meal," explains Miss Ethel M. Snodgrass, head of the home economics department, who is teaching the students to eat scientifically. Etiquette is not taught in the class, which meets once a week, Miss Snodgrass believing that students learn at boarding clubs the proper use of the knife and fork.

Wonderful

The Wife (rapturously)—Oh, Robert, I've won a $500 prize for the best article on the cruelty of trapping wild animals.

Her Husband—Good! What are you going to do with it?

"Oh, now I can afford a new fur coat."

Soulsby's Long Service

For 50 years Sir William Soulsby has been secretary to London's lord mayors.

SUCCESS IN AMERICA AN OPEN HIGHWAY

How Four Boys of Humble Origin Have Become Chiefs of the Greatest Financial Organization in the World.

Broad highways of achievement are wide open to all in America no matter how humble their beginning, it is brought out by a writer in Forbes Magazine, telling of the successive elevation of poor boys to the chieftainship of the most powerful association of financial power in the world.

"Nowhere is opportunity so democratic as in caste-free America, nowhere is recognition for faithful service so little conditioned by inherited position and wealth," the article says. "The bounty of America in bestowing her rewards of great success upon those of modest origin is again notably manifest in the rise of Oscar Wells to the presidency of the American Bankers Association.

"The son of a tanner, John H. Puelicher, was elected to this eminence in 1922. Circumstances ended his public schooling in the seventh year and he went to work in a carpet store in Milwaukee. At sixteen he entered a bank as a clerk, rising step by step until he became president. Recognition of his abilities as a banker and civic service through public education in sound economic understanding brought him the highest reward from his profession.

"A former country school teacher, Walter W. Head, born in a farm hamlet in Western Illinois, was elected president of the association in 1923. He gave up teaching and a salary of $75 to enter banking at $40 a month in a small Missouri town. He subsequently became president of a bank in Omaha, the largest in Nebraska and a dozen neighboring states. The position he occupied in advancing agricultural welfare during the period of depression led to his being called the 'Granger President of the American Bankers Association.'

"From Irish immigrant lad to supreme head of banking in America epitomizes the career of William E. Knox, president of one of the largest savings banks of the country in New York. His business career began as an office boy in a publishing house, and he later entered the bank as a clerk. Experience with humble people in their problems of personal finance and his inculcation of economy in all matters attracted country-wide attention.

"Oscar Wells, who rises in 1925 as successor of these men, was born in an old weather-boarded log cabin house in the Missouri River bottoms of Platte County, Missouri. He became an orphan when three years of age, losing his parents in an epidemic that ravaged the countryside. He passed under the care of an uncle, head of a small country bank in Platte City, a town of a few hundred inhabitants, growing up on a farm and receiving his early education in a rural school. He later entered Bethany College, West Virginia, but at the end of his junior year he had to quit college and go to work in the bank."

His subsequent career was one of steady progress, first to higher positions among small country banks, then to larger city banks in Texas, where he rose to the top. In 1914 he was chosen first governor of the Dallas Federal Reserve Bank and served through the opening period of the establishment of that institution. He resigned to become president of a bank in Birmingham, Alabama, which has grown under his administration to be one of the largest and most successful institutions in the South.

HUGE GROWTH IN SCHOOL SAVINGS

New York.—School savings in the United States for the year 1924-1925 increased in aggregate bank balances by $5,500,000, with a growth of 630,000 in the total number of pupils participating, it is shown in reports made to the American Bankers Association, which declares that the returns encourage belief in the permanence of school savings as a part of the educational program in the public schools.

During the year the number of reporting school savings systems increased from 683 in 742 districts to 760 in 1,557 districts, the number of schools from 9,080 to 10,163, the number of pupils participating from 2,236,-326 to 2,869,497, the deposits from $14,991,535.40 to $16,961,560.72 and the bank balances from $20,435,144.64 to $25,913,431.15, says W. E. Albig, in charge of the Association's savings activities.

Since 1920, the first year for which comprehensive statistics are available, the number of schools having school savings banking has increased 271.4 per cent, the enrollment in school savings districts 278.9 per cent, participants 520.2 per cent, deposits 506.1 per cent and bank balances 516.8 per cent.

New P G & E Plant

Pacific Gas and Electric Company is beginning construction on its new Mokelumme River Project. A $10,000,000.00 development program is under way. Crews of men are moving in for the construction of approximately fifty miles of power line from the Electra Power House located near here to the Salt Springs dam site. This new line will serve temporary power for the construction work. Twenty five miles of road are to be built, taking in part of teh old road running into Tiger Creek Mil site. The company's Mokelumne River development involves the construction of a dam on the Mokelumne River at Salt Springs, approximately four miles up stream from the Junction to the Mokelumne with its principal tributary the Bear River. According to the report of the engineers this will be one of the highest rock-filled dams in the world. The dam site will be at an elevtaion of 3800 feet above sea level and lies in a granite country typical of the Sierra Nevada Range. Cliffs in excess of 1000 feet in height rise from the stream on either side of a narrow gorge. The dam will be two hundred thirteen feet in height, or rock filled construction with concrete face and will require one million cubic yards of material for its construction.

The water impounded will create a reservoir of 60,000 acre feet capacity. From an intake at the dam, the water will be conveyed by a concrete lined canal and tunnel for a distance of twenty five miles to Tiger Creek. At this point the water will be dropped 1200 feet through penstocks to operate a new power house with an installed capacity of 47,000 horsepower. The water will be carried from the Tiger Creek Power House to the Company's Electra Power House, where it will be further used for the generation of electric energy, increasing the output of the Electra Power House which has now an installed capacity of 26,810 horsepower.

STATEMENT

Statement of Ownership, Management, Circulation, etc., required by the Act of Congress of August 24, 1912, of Campbell Interurban Press, published weekly at Campbell, Cal., for April 1, 1926.

Before me, a Notary Public, in and for the State of California, County of Santa Clara, personaly appeared H. C. Smith, who having been duly sworn according to law, deposes and says that he is the editor of the Campbell Interurban Press.

Publisher, editor, and sole owner, Harry C. Smith, Campbell, Cal.

Bondholders or mortgagees, none.

Sworn to and subscribed before me this 1st day of April, 1926.
JANICE BAUGH, Notary Public

GONE!
